

Grindstone Island History: "Cast In Stone"

The Grindstone Island Research & Heritage Center's Mission is to preserve and protect the Upper Schoolhouse of Grindstone Island and to nurture the cultural, historical, and social aspects of the island by collecting, preserving and teaching regional, island and family heritage.

In keeping with our mission, the GIRHC is launching a major fundraising campaign that will become an indelible part of our island history. As part of the schoolhouse's improvements, the Town of Clayton and the Heritage

Center will combine their resources to replace the concrete in front of the entry with a handsome new area made of pavers. This is a wonderful opportunity for all to join together and put a permanent and generous mark on the new front walkway by buying one or more pavers with your personal inscription. The Heritage Center is promoting the Paver Project to build our funds to secure for posterity, the incredible history of this island we all are drawn to; whether a first or fifth generation Islander, multi-generational Summer Families or a dear Friend of the Island, everyone has the same desire to preserve the unique history of the

Island. Friends and family members who no longer are able to get to the Island could also imbed a bit of their personal love of Grindstone into the schoolhouse yard and be remembered as part of the rock and mortar of Grindstone.

Inscription Suggestions – In addition to inscribing your own gift, you might commemorate your entire family, a past family member who loved the island, an ancestor, or some historical spot on the island – such as Dodge Memorial Hall, the Grindstone Island United Methodist Church, the Cheese Factory, or other spots you love, such as Potter's Beach. Note: There is *no* preference for placement of blocks.

The Grindstone Island Upper School House Paver Project
